Alliance for Precision Health

HEALTH CARE DELIVERY

Leverage Siemens Heathineers' medical technology and digital solutions to care for patients across Missouri

Optimize operations within MU Health Care's hospitals and clinics

Develop best practices in diagnostic and therapeutic treatments

HEALTH CARE INNOVATION

Integrate digital health tools to transform care delivery

Give clinical departments access to timely, meaningful, actionable data

Develop integrated digital workplace

EDUCATION AND WORKFORCE DEVELOPMENT

Co-develop curricula in cybersecurity, data science, machine learning and artificial intelligence related to health care

Provide mentoring and recruitment opportunities to clinical and engineering students

RESEARCH AND COLLABORATION

Pursue research using the latest medical technology

Initiate projects that focus on advancing and implementing precision medicine

Advance our ability to prevent, detect, treat and cure devastating diseases like cancer, Alzheimer's and cardiovascular disease
